Flush Bolts

Our flush bolts are available in locking and non locking options for both inward and outward opening. They have been designed with a low profile handle and keys to prevent clashing of the doors once open, reducing damage to the flush bolts. Choose between our 4 finishes to match your hinges.

Component	Description	Product Code	
		Non Locking	Locking
Flush Bolts Outward opening	190mm flush bolt	FB190*	FB190L*
	450mm flush bolt	FB450*	FB450L*
	600mm flush bolt	FB600*	FB600L*
	1000mm flush bolt**	FB1000*	-
Flush Bolts Inward opening	190mm flush bolt	FB190IB*	FB190IBL*
	190mm flush bolt - necked	FB190IT*	-
	450mm flush bolt - necked	FB450IT*	-
	600mm flush bolt - necked	FB600IT*	-

* Replace with colour for full product code (s = satin, c = chrome, g = gold and b = black)

** FB1000 is only available in black or satin

Twinbolt Locking System

As an alternative to traditional flush bolts, Twinbolt offers a secure two-point locking system via top and bottom throw rods – all operated with a simple turn of a handle. This offers a user friendly experience which eliminates the need to reach the top and bottom of the door and is the preferred choice for applications requiring an aesthetic and concealed appearance.

Component	Description	Door Thickness Range	Max. Door Height	Product Code
Twinbolt	For Securefold Pro	56 - 68mm	3300mm	TB/SF
	For Securefold Bottom Rolling	56 - 68mm	3000mm	TB/SFBR
	Twinbolt handle			TWINHAN/S
	Routing cover strip			TBCS/**

** Replace with colour for full product code (br = brown, bl = black and wh = white)

Handle

Our universal handle for Securefold can be fitted anywhere on the bifold door system and aids in the easy opening and closing of the doors.

Component	Description	Product Code
Handle	Universal Handle	SF10*

* Replace with colour for full product code (s = satin, c = chrome, g = gold and b = black)
